.

SUMMARY/OBJECTIVE

Dedicated front-end developer with an Associate's degree and a strong foundation in a variety of front-end languages and frameworks. Passionate about creating intuitive and visually appealing user interfaces, adept at translating design concepts into responsive and functional web applications. Proven ability to collaborate effectively in team environments and adapt quickly to emerging technologies, aiming to contribute expertise in crafting engaging digital experiences.

WORK EXPERIENCE

Booze Bashers Game
Web Developer, Andover, KS*, Aug 2022- May 2023*

- Led the development of the landing page for the Booze Bashers web game, a collaborative capstone project. The project involved designing and creating a web presence to promote the game and provide an engaging user experience.
- As the web developer and designer for the project, I was responsible for:

  - Creating an interactive and visually appealing landing page using HTML, CSS, and JavaScript.

  - Implementing responsive design principles to ensure optimal user experience across various devices and screen sizes.

  - Collaborating with team members to integrate game-related content and assets into the web page.

  - Conducting usability testing to gather feedback and make iterative improvements to the landing page.

UserTesting
Product Tester, Remote, *May 2023 - Present*

- Contributed to the UserTesting team for the past year, gaining valuable experience in usability testing and quality assurance processes.
- I conducted usability tests and provided feedback on digital products in order to identify and document user experience issues and software defects.
